

Internet Recharter 2.0 DEMO Site

Commissioners and other interested leaders are now able to access a DEMO site to simulate the recharter process. This site can be used for training purposes that will help individuals become more familiar with the platform.

- url: <https://advancementspp.scouting.org/login>
List of user accounts to access the demo site can be found [here](#)
List of test data to simulate the process of adding members can be found [here](#)
- Be aware of the following:
 - The site may take long to load. Once the page is loaded, you should be able to experience the demo at close to normal speed.
 - When you click the recharter button, the first screen should ask you to select your charter term. If you do not see that screen, that means another individual is using that unit for demonstration purposes. Please select another unit.
 - Do not add members, except from the test data provided above.
 - Refresh roster has limited functionality in DEMO site and will not pull in new members added through my.scouting.org online registration.
 - Data is refreshed every **Friday at 2am**, which will reset all recharterers in process.
 - If validation is successful, **DO NOT** proceed to payment as site is not setup to process payment information.
 - The DEMO site is using development software, therefore there may be “bugs,” occasional errors appear, and it may run slower. This should not affect your ability to become more

For additional information, please visit the following url to view the webinar training, FAQs, and the User Guide.

- <https://www.scouting.org/resources/internet-rechartering/>
- Finally, it is encouraged that each commissioner working with a unit contact and visit with their unit leaders engaged with unit recharter to compare notes, prepare the roster details prior to October 2 (for units with expiration dates of 12/31), and assist each other to ensure a smooth and timely charter renewal
